

# ShowBuz Privacy Policy

**Effective date:** 31st August 2026

**Last updated:** 31st August 2026

ShowBuz ("the app", "we", "us", "our") is a scheduling and deputy ("dep") booking tool for musicians and other performers working in theatre and live entertainment. This Privacy Policy explains how we collect, use, disclose, and protect your personal data, and the data of individuals you log within the app.

ShowBuz is provided by ShowBuz. We operate as the Data Controller for the personal data processed through our service under the UK General Data Protection Regulation (UK GDPR) and the Data Protection Act 2018.

For any privacy-related inquiries, you can contact us at [admin@showbuz.app](mailto:admin@showbuz.app).

## 1. Data We Collect and How We Source It

We process personal data from two categories of data subjects: **Account Holders** (users who register for the app) and **Deputies / Network Performers** (individuals whose details are inputted by Account Holders).

### A. Data Collected Directly From You (Account Holders)

- **Account Information:** Name, email address, and secure authentication tokens handled by our identity provider.
- **Show and Booking Data:** Show names, venues, performance dates, rehearsal schedules, chair/role details, and linked financial/booking rates you manually enter.
- **Device Permissions (Optional):**
  - *Calendar Access:* If enabled, we read and write calendar events (e.g., Apple Calendar) to sync your schedule locally on your device.
  - *Contacts Access:* If you choose to import a dep, we only access the specific contact entry you select to pre-fill their profile. We do not download or scrape your entire contact book.
  - *Location Data:* If you enable "Travel Assist", we collect your device's GPS location (including in the background while the app is closed) to send real-time travel and journey notifications.
- **Push Notification Tokens:** Unique device tokens required to deliver transactional alerts (e.g., booking confirmations).
- **Usage and Diagnostic Data:** Technical logs, device type, operating system version, app usage statistics, and crash reports processed via Sentry (which may contain temporary fragments of app memory at the exact moment of a crash).

### B. Data Collected From Third Parties (Deputies / Network Performers)

- **Dep Contact Details:** Name, phone number, email address, and instrument(s) played.
- **Source:** This data is not provided by the individual themselves, but is inputted manually or imported from device contacts by an Account Holder to manage their professional network.

## 2. Legal Bases for Processing Under UK GDPR

We only process personal data when we have a valid legal framework. The legal bases we rely on are:

1. **Contractual Necessity (Art. 6(1)(b) UK GDPR):** To set up your account, manage your show diary, process your workflow, and deliver core app services.
2. **Legitimate Interests (Art. 6(1)(f) UK GDPR):**
  - *For Account Holders:* To monitor app stability, fix bugs via diagnostic tools, and improve app functionality.
  - *For Deputies / Third Parties:* To allow Account Holders to efficiently manage professional business networks and send freelance work offers. It is within the reasonable expectations of freelance performers to be contacted for work opportunities by colleagues.
3. **Consent (Art. 6(1)(a) UK GDPR):** For processing precise device location (Travel Assist) and sending device Push Notifications. This consent can be instantly revoked at any time via your device's operating system settings.

### 3. Communication and Our Article 14 Obligations

Because Account Holders input personal data belonging to third-party Deputies, we are required by Article 14 of the UK GDPR to inform those individuals that we hold their information.

To comply with the law without disrupting your professional workflow:

- **Transparency at First Contact:** The very first time an Account Holder sends an automated booking request or availability poll to a Dep via SMS, WhatsApp, or email, ShowBuz will append a clear, non-intrusive link to this Privacy Policy.
- **Direct Opt-Out:** That message will inform the Dep that their details are stored securely in a colleague's digital address book within ShowBuz, and provide them with an immediate method to opt-out and have their data permanently deleted from our servers.

### 4. Data Sharing and Third-Party Service Providers

We do not sell, rent, or trade personal data. We only share data with trusted service providers who act as Data Processors under strict contractual boundaries:

- **Supabase:** Secure cloud database hosting and backend infrastructure.
- **Sentry:** Real-time software crash analysis and debugging logs.
- **Twilio & WhatsApp Business API:** Core infrastructure to route SMS and instant messages to your network.
- **Apple:** Relaying push tokens and coordinating local device permission frameworks.

### 5. International Data Transfers

Some of our third-party infrastructure providers operate servers located outside of the United Kingdom and the European Economic Area (EEA), primarily in the United States.

Whenever your data is transferred outside the UK, we ensure a legally compliant mechanism is in place. We secure these transfers using the **UK International Data Transfer Agreement (IDTA)** or the **UK Addendum to the European Commission's Standard Contractual Clauses (SCCs)**, alongside technical safeguards like end-to-end transport layer encryption.

### 6. Data Retention and Deletion Timelines

We abide by the principle of storage limitation. Data is kept no longer than necessary:

- **Active Accounts:** Personal data, show records, and custom dep profiles are retained as long as your account remains active.
- **Account Closure:** If you close your account or request data deletion, all personal data, show histories, and associated dep records will be permanently erased or anonymized from our production systems within **30 days**.
- **Inactivity Purge:** Accounts that remain completely inactive for a continuous period of **24 months** will be automatically flagged, notified via email, and subsequently deleted along with all associated records.
- **Dep Data Removal:** If an Account Holder deletes an individual dep from their application address book, that dep's record is instantly wiped from our active databases.

## 7. Your Statutory Rights

Under the UK GDPR, both Account Holders and Deputies possess comprehensive data rights. You can request to exercise these at any time by emailing **admin@showbuz.app**:

- **Right of Access:** Request a complete copy of all personal data we hold about you.
- **Right to Rectification:** Request corrections to inaccurate or incomplete personal records.
- **Right to Erasure ("Right to be Forgotten"):** Request permanent deletion of your data from our systems.
- **Right to Restrict or Object to Processing:** Challenge our reliance on Legitimate Interests to process your data, or restrict how we use it.
- **Right to Data Portability:** Request a digital, machine-readable export of the data you provided to us.

If you believe we have processed your data unlawfully, you have the right to lodge a formal complaint with the UK supervisory authority:

- **Information Commissioner's Office (ICO)**
- Website: <https://ico.org.uk>

## 8. Security Measures

We enforce rigorous technical and organisational controls to protect data. This includes using Secure Socket Layer (SSL/TLS) encryption for all data in transit, strict access control restrictions on backend cloud databases, and automated dependency scanning. While we deploy industry-standard architecture, no digital transmission or storage engine is 100% secure, and we cannot guarantee absolute security.

## 9. Children's Privacy

ShowBuz is a specialised administrative utility designed strictly for working professional adults in the entertainment sector. We do not knowingly target, market to, or collect data from individuals under the age of 18.

## 10. Modifications to This Policy

We may routinely update this policy to reflect product feature shifts or changes in legal regulations. Material modifications will be broadcasted to users via an in-app notice or directly through email. The "Last Updated" timestamp at the apex of this document will alter accordingly.
